Subject: glyphosate levels
Date: Wednesday, June 21, 2017 11:38:45 AM

The only safe level of glyphosate is ZERO. Please set the level to zero. Glyphosate is damaging to everyone... as it damages the shitmake pathway in gut bacteria, which they use to make essential amino acids.

Please look for one moment and you can find much more information than this. I believe it is at the root of all chronic illness we see now - especially in children.
